**Chapter 14****①**

Posure:

Vircingetoris is living in a technologically advanced social democracy with backdrop to 'enlightened' dictatorship. Since AC is being attacked on all sides, though invincible with magneticfields, domes & laserdefencesystems.

The harmonic resonance of magneticdomes has instilled an accelerated evolutionarycomplex in the populace.

The politicalparties, mediums for the power of money, are still active and busy. Thanks to Vircingetoris, they are in a state of mild angst-paranoia watching their keyspies being slaughtered and unable to point a finger.

AC is ocupied by the following: SocialDemocrats, Liberal, Conservative, Green, Capitalists, military (LDS), Fanatics (religions & extremists), Underground, Computer, Technology, Charities media, Science, Anarchists, Mysticysm, and Individuals. Oh don't forget secretforces. And Uncertainty.

Vircingetoris is carefully watching the projected timing of the parties involved for the next political comparap is aimed for a couple of months from now

when the temporary war has ended; AC is confident in its selfdefence and it does not retaliate with illegal mobilelaserforces.

There is a privatesector and a publicsector. The thousands in the public are roofless, moneyless vagabonds in cooperatives and collectives with owned apartmentbuildings.

AC is a multi-levelsupercomplex of apartmentbuildings and tunneltransporttubes. The night life is alive and active for their is only 1% unemployment. Much is internal for there is insufficient space for unending storewindows.

On manywalls are the signs of the various competitors in the market. Yet 98% of the wealth is in 2% of the population. Of which there is 450 million people, registered.

As one can see in this silver shynymetal and glass superempire it is easy for rebels like Vircingetoris to make counterstrikes against imbalance.

The difficulty lies in mass demoralization due to high employment rates, full-time jobs legally requited, 'temporary' 'enlightened' dictatorship, addiction to MAXHeadroom like media.

The 'lows' in AC are of the groups. Thus there is massive conformism forced along alllines of produce.

What other system could such a metropolis have?

Vircingetoris's goal is ;as a last-ditch effort to to generate an anarchistic destructing revolution. His primary goal is to generate a revolution for pure democracy based on absolute defence.

Via the stupendous information-technologynetworks voting on all major decisions could be done.

Vircingetoris first phase is succeeded: disvest, paranoia, increase in anarchy. His second phase is eagerly rubbing its hands: Infiltrate, infiltrate, infiltrate!

And Vircingetoris is no an unknown (mostly)!

Yet the power still rests in the hands of groups who would rather not change then change.

Lifeexpectancy due to populationdensity is remarkably low for a 2013 Earth equivalent city. It is 100.

There is no desire by the majority to increase lifeexpectancy because then keylegislativepositions will then change slower. With storter political-terms as required by the terms of pure democracy there can be more turnover. With more turnover thie is more profit.

Vircingetoris is a man of the people. His quest is to eliminate the powers that be and give voting on all major decisions to the people, pure democracy, power-to-the-people. With power to the people they can evolute faster because change is easier.

Vircingetoris couldn't be a politician because politicians are all bying puppets. They are cowards too.

Vircingetoris could not be a business tycoon because then he would not be a politician, restricted to commercial physical product.

Vircingetoris only hope is to infiltrate, infiltrate, infiltrate! Vircingetoris must enter each of the cities sectors and create waves of influence. **SpyKilling** is one way. With fear, sectors will be swayed to make particular decisions based on which particulars are assassinated. Hate can also be smoothly manipulated.

Vircingetoris is not an individual anarchist, he is an independent label working within his group. With this measure of privacy safety is assured: There is not the mon-force to sift through all passive surveillance. And Vircingetoris is streetwise; There is no need to say unnecessary things...

With knives and potentially lethal projectiles all-covering as ; Commodus Necessities ; it is a wonder there isn't total destructive anarchy. Within the private sectors, and absolute private sectors anything can go. It must be the tourism.

AC is almost self-sufficient with recycling, indoor greenhouses, and multi-level complexes for money.

Peace is desired to increase profits. On a sustainable developing-process the future's children children children are guaranteed. Then you have the

desired itopion state or pure democracy based on non-valued voting.

Its the numbers that count.

Politicalparties can influence as opposed to ruling. Then the millions of buyers can demonstrate their power. The doublehead of the people through cheer buying power and non-valued voting proves the force of the numbers. They've got the guns, we have got the numbers.

Thus a primetorget for Vircingetoris is the military. By infiltrating the military he can come to fore and generate, inspire, influence public opinion to the absolutebasis of pure democracy: absoluteinvincibility through magneticfields and laserdefencesystems.

The lasers are in AC, though pure democracy is not.

This is an imbalance in the hands of social democracy & enslavement of the populace, thus demoralization, then anarchy.

Vircingetoris can not work through the media because despite its size the population is already comfortablynumbed. The virtualnetworks are bristled with traffic everyday. But the media cannot change the government through revolution or self-encrownment because the media is a paisez ever-present entertainmentforce. Thus the media should be a secondary infiltration business with their their huge internalentertainmentnetworks.

Vircingetoris is convinced that the only way to generate revolution to pure democracy is on the basis of absolute defenseinvincibility.

Defenc ad absurdum, Poetry ad infinitum.
